

ABOUT US

Founded in 2015, We help customers use technology to slash the time it takes to turn ideas into value. In turn, they transform industries, markets and lives.

Some of our customers run traditional IT environments. Most are transitioning to a secure, cloud-enabled, mobile-friendly infrastructure. Many rely on a combination of both. Wherever they are in that journey, we provide the technology and solutions to help them succeed.

We make IT environments more efficient, productive and secure, enabling fast, flexible responses to a rapidly changing competitive landscape. We enable organisations to act quickly on ideas by delivering infrastructure that can be easily composed and recomposed to meet shifting demands so they can lead in today's marketplace of disruptive innovation.

We deliver high-quality, high-value products, consulting and support services in a single package. That's one of our principal differentiators. We have industry-leading positions in servers, storage, wired and wireless networking, converged systems, security, cabling, software, services and cloud. And with customised financing solutions and strategy, we can provide the right tech solutions for your unique business goals.

OUR SERVICES

-CABLING AND FIBRE OPTICS; FIBRE OPTIC INSTALLATION AND SPLICING

SCOWN Technologies has extensive experience and expertise in successfully installing, terminating and commissioning fibre optic infrastructure projects for our clients. All projects, from new area networks to a single cable installation are given the same level of attention from every member of the SCOWN Team.

Fibre optic connectivity forms a huge part of Data Centre infrastructure and enables the high bandwidth connectivity required to transmit such large

volumes of information. SCOWN is vastly experienced in Data Centre Installations.

Our Fibre Optic Services include:

- Fibre Optic Network Detailed Design
- Single mode Fibre Optic Cabling Installations (OS1 & OS2)
- Multimode Fibre Optic Cabling Installations (OM1, OM2 ,OM3 and OM4)
- Fusion Splicing, Glue & Polish, Mechanical Crimping
- Fibre Testing & Certification, including OTDR and OLTS.
- Full Fibre Optic Network Documentation
- Data Centre Fibre Optic Solutions
- Pre Terminated Fibre Optic Solutions
- Full fibre optic network surveys and documentation
- Fibre Optic Circuit Troubleshooting

Structured Cabling is all about creating the infrastructure that builds connectivity. SCOWN has established a strong reputation in the industry by taking a partnership approach with all our clients. At the heart of this approach is a willingness to be flexible, responsive and to always find a way to be proactive in achieving project deadlines.

We are highly experienced in CAT 5 e, CAT 6 and Cat6a systems in both UTP and FTP in complete end to end solutions from leading manufacturers. We invest in the specific brand training and the most up to date testing equipment which is vital to ensuring a quality installation is delivered. SCOWN Technologies is Vendor Independent and we are Certified Installers of the following cabling solutions: MOLEX, BRAND REX, NEXANS and EXCEL. All installations completed by SCOWN Technolgoies comply with industry standards including ANSI/TIA/EIA 568-B, BS EN 50173-1:2011 & IEC 60794.

-DATA CENTER AND NETWORK SECURITY INFRASTRUCTURE

Adapt your security to new threats

Transform from reactive static security and recovery practices to intelligent, adaptive models to keep pace with new cyber threats and technology initiatives. Define your strategy to mature or remediate gaps in your security, compliance, IT continuity and disaster recovery programmes. Our experts develop and apply adaptive next-generation security architectures, unify security and compliance on- and off-premises, and innovate with automation and intelligence.

Our Next Generation network infrastructure services include end-to-end, enterprise-wide network services, and products to support your business objectives – today and in the future. Our network-designed services will secure your networks with single-pane management. We can help you automate with software-defined access and next generation LAN and SD-WAN service.

Our team helps you assess, design, and install the physical infrastructure your organization needs to support mission-critical initiatives. We help you sort through an ever-increasing array of solutions from top manufacturers like Cisco and HPE to select the best technology to meet increased demand for new media applications, interactivity, automation, and mobility. We offer core routing and switching, Next Generation LAN / SD-WAN, wireless, and management suites.

-FULL HOME AUTOMATION

At SCOWN, we provide state-of-the-art home security, technology, energy management, convenience and mobile applications to help protect homes and families.

- *Monitor and remotely control your door locks*
- No more leaving a key under the mat or rushing home to meet the plumber. Fluent allows you to view and control your locks remotely.
- *View 24/7 live video feeds from your HD cameras*
- Be home even when you're away from home. With high definition indoor & outdoor cameras, never miss the good and the bad.
- *Let schedules take care of it*
- Never forget to lock your doors, turn off your lights, and arm your security system. Let SCOWN schedules take care of it for you.
- *Be in the know... Your system will notify you*
-

-SECURITY SYSTEM INSTALLATION (CCTV)

At SCOWN PROPERTIES we provide full service and installation of the best value CCTV systems the world has to offer. We have over 10 years experience in the supply and installation of the latest super high definition megapixel IP cameras and network video surveillance systems.

Our team of experienced CCTV installers can supply, install and maintain your security cameras and CCTV security systems and ensure that they are operating effectively and to your satisfaction.

As you could appreciate, CCTV Cameras and CCTV Surveillance Camera Systems have many uses, some of which are:

- Installation of CCTV Systems to provide quality assured security using anti blur technology to identify bar codes and number plates and store them accurately for later viewing
- Monitoring and CCTV Surveillance of tough environments servicing both inside and outdoor areas with vandalism resistant security cameras
- CCTV Surveillance to monitor inwards and outwards goods and people by using movement sensing CCTV Cameras

- Installation of CCTV Systems to enable Access Control and Alarm Monitoring

- GENERAL IT SUPPORT AND CONSULTANCY

SCOWN Technologies has the know-how and experience to pull off the toughest IT initiatives and deliver your solution on-premise, in the cloud, or in a hybrid environment. Trust us for your networking, data storage, security, disaster recovery, software, and orchestration implementation needs. Learn how we can help you lower costs, increase agility, and security.

SCOWN are experts in assessing and reducing client risks with technology assessments and consultation. We offer security evaluations to identify security risks as well as comprehensive cloud, network and data center assessments, and wireless health checks. Our team of technology experts specialize in program and project management, business process analysis, organizational change management, facilitation, and strategic consulting. Let our IT experts identify your issues or vulnerabilities and design a comprehensive solution to protect and streamline your enterprise.

Project Delivery

SCOWN Technologies is SSAE-16 certified with a dedicated team of engineers who have the expertise to deliver comprehensive support and best practices for all of your project management needs. Our project delivery is unsurpassed. No project is too big or too small. We take on day-to-day accountability to manage the solutions we engineer and implement. Let us take the burden off your internal IT staff so they can focus on core projects.

Managed Infrastructure

Organizations today require an IT provider that is agile enough to completely manage their infrastructures while meeting their compute, storage, and networking demands with a simple, yet scalable solution. SCOWN does all of

that and more. Our cloud team offers Infrastructure as a Service, Backup/Replication as a Service, and Disaster Recovery as a Service with proactive monitoring, custom application solutions, best of breed technology options, and best-in-class support.

24x7x365 Support

Your IT enterprise requires 24/7 attention. SCOWN's E-Care team is always on call and ready to troubleshoot and resolve critical system issues quickly and efficiently from our -Ghana-based Command Center. There are no after-hours disruptions and we respond faster than internal staff. SCOWN offers full support in special situations including disaster response/mitigation along with a full suite of Managed Care Services.
